

Harun Senegör

Born in İstanbul 1963

Graduated from İstanbul Technical University, 1989

Harun Senegör completed his undergraduate studies in İstanbul Technical University Department of Architecture with second place and received his Msc grade in the same university in making research about "Integration Problems of Precast Facade Elements in Conventional Buildings". He won 1st place in the "National Reassurance Office Building Project" with Şandor Hadi and 2nd place in "Taksim Square Rehabilitation Project" with Behruz Çinici.

After working in Jerusalem and Telaviv between the years 1989-1991, he established his first office with two partners in 1992 and than in 1998 Harun Senegör established his new office "LOFT ARCHITECTS" and made several housing projects, private houses, shopping malls, factory buildings, hotels and their interior designs as well . The international company provides project development, management and controlling services. The principle is to find the optimum solution for the customer and user, with inventive production methods in order to increase investment profit without making concessions of architectural quality.
