

Serdar Tuna

Born in Lüleburgaz 1973

Graduated from İstanbul Technical University, 1996

Serdar started his career during university years working as an architect for various companies. During this period, he has worked with Aras Insaat and ENKA, on projects ranging from medical buildings, theatres, hotels, transportation hubs, offices and residential buildings most of which located in Russia. Also together with Mustafa Toner, he realized interior design projects on stores, public house, restaurants and within Koc Holding congress and hotel building renovations.

He's been proceeding with his profession with Harun Senegör in Loft Architects since September, 1999. In nearly 15 years with Loft Architects Serdar's active participation in the creative process begins with conceptualization and continues through design development. His ongoing responsibilities include leadership of design teams within the studio and coordination with client and consultant team members.
